# MT16 Multi-MAX™ TENDER

**MAX-imize your  
delivery  
capabilities.**

## **Now there is a tender that was designed to solve all of your bulk delivery problems; the Tyler MT16 Multi-MAX. It gives you:**

MAX-imum capacity - 514 cubic foot struck in the 2 hopper version and 771 cubic foot with 3 hoppers for loads up to 24 tons!

MAX-imum discharge capacity - 3500 + pounds per minute.

MAX-imum 40° body slope - All 4 sides are 40% for the fastest, easiest clean out you have ever had. Even with impregnated fertilizer.

Max-imum versatility - Use as a pit-dump unit through the large clean out doors under each hopper or back up to a conveyor and power-unloaded through the horizontal auger. And you can add extra compartments; each with a separate shut off gate to eliminate that extra trip with a short load

MAX-imum strength - Truss support structure lets the MT16 flex with the truck frame. There are no rigid gussets to weaken and crack from constant use over rough roads and driving through ditches. MAX-imum discharge height - Unloads at a full 13' 4" to reach into any existing floater with room to spare.

For MAX-imum performance, efficiency and dependability you can't beat the MT16 Multi-MAX from Tyler.

### **You know Tyler value.**

*It's made Tyler the name you can always count on - through good times and bad - in the field, and again at trade-in-time. Tyler value makes a real difference.*
